SKILLS

- React, Java, Javascript, Python, Node.js, Next.JS, CSS, HTML, TypeScript, MongoDB, SQL Server, PostgreSQL, Power BI, Visual Studio, REST API, SQL, MySQL, Express.js, AWS, Angular, Git, postman

EXPERIENCE

FullStack Engineer Intern

Aug 2024 - Aug 2025

Suzlon Energy Ltd

- Developed and optimized 10+ SQL queries, reducing execution time by 30% and improving data retrieval performance.
- Built interactive Power BI dashboards, enhancing decision-making with real-time analytics and improving reporting efficiency by 20%.
- Engineered a full-stack weather dashboard using React, Node.js, and MongoDB, integrating external APIs for real-time data.
- Improved application responsiveness and scalability through efficient API handling and optimized backend logic.

PROJECTS

Loan Management System Full Stack MERN Application

🔗 <https://loan-management-system-gw4k.vercel.app/>

- Developed a full-stack loan management system using Next.js, TypeScript, Tailwind CSS, Ant Design, Node.js, Express.js, MongoDB, and Docker with secure role-based authentication and protected routing.
- Implemented borrower onboarding, loan workflows, document uploads, approval management, dashboard analytics, and scalable REST APIs with JWT authentication.
- Optimized application performance through responsive UI design, seamless frontend-backend integration, and Dockerized deployment for scalable environments.

AI Resume Matcher- Full Stack Application

🔗 <https://job-simply-ai.vercel.app/>

- Developed an AI-powered career platform using React.js, Node.js, Bootstrap, PostgreSQL, Python, Cloudflare CDN and NLP for resume analysis, ATS scoring, and job description matching.
- Implemented AI-driven resume generation, cover letter creation, keyword extraction, text similarity matching, and personalized job-fit recommendations.
- Built scalable REST APIs and backend workflows for resume parsing, career insights, and intelligent candidate evaluation using modern AI techniques.

Food Ordering Mobile Application

🔗 <https://github.com/yemulambika/FoodOrdering>

- Built a cross-platform food ordering application using React Native and Supabase, implementing authentication, REST API integration, routing, and state management.
- Developed reusable and responsive mobile UI components with real-time menu and order management using cloud backend services.
- Optimized navigation and application performance while following component-based architecture and modern React Native. Managed source code using Git and GitHub following version control best practices.

Movie Ticket Booking Platform Full Stack MERN Application

🔗 <https://book-my-show-clone-six-wine.vercel.app/>

- Developed a full-stack movie ticket booking platform using React.js, Node.js, Express.js, and MongoDB with JWT-based role authentication (User, Partner, Admin).
- Built theatre onboarding, movie browsing, seat booking, payment integration, and admin approval workflows.
- Enhanced the UI with GSAP animations, responsive design, and optimized REST APIs for better performance and scalability.

ACHIEVEMENTS

- Scaler Academy Certification - Data Structures & Algorithms, MERN Stack, React.js, JavaScript, Database Management & SQL
- Velocity Institute Certification - Machine Learning & Data Science

EDUCATION

BSIOTR JSPM College Of Engineering

2024

BE/B.Tech/Bs

SCALER ACADEMY

Specialization: Software Development & Problem Solving (2026)
